RESUME SUMMARY

- 2+ years’ experience in creating complex, scalable, and responsive web applications heavily focused in JavaScript and HTML/CSS with ReactJS and related frameworks.
- Established abilities to leverage full-stack knowledge and experience to build interactive and user experience focused websites and applications.
- Driven and thrive in scrum and agile team environments and heavily motivated to develop impactful software while growing to my highest potential as a Software Developer.

SKILLS

ReactJS	Redux	Context API	JavaScript	TypeScript
HTML/CSS	NodeJS	MySQL	PostgreSQL	Git
AWS	Netlify	Azure	UI	UX

MY WORK

Piranha Pools Website: piranhapools.com

Piranhapools.com is a locally owned pool cleaning and supply business and service and is built using HTML/CSS and Godaddy’s website building and hosting service.

Portfolio: <https://hunterfoulk.com>

My personal portfolio website built with React with Gatsby.js, HTML, and SCSS.

Springboards: [Demo Link](#) & [Demo video](#)

Springboards is a platform for anonymous users to engage and openly discuss a variety of categorical topics built with ReactJS with context API for complex state management along with NodeJS, PostgreSQL, and Azure.

Flychat: [Demo Link](#) & [Demo video](#)

Flychat is a online group video watching and live chatting website for users to create rooms and join them to watch videos in sync together and chat in real time built with Web sockets, React, NodeJS, and MySQL.

EXPERIENCE

Web Developer & Pool Technician, Piranha Pool Service

September 2020 – present

- Maintaining a booking website powered by GoDaddy, ultimately streamlining the booking process and enhancing customer experience.
- Designed and developed the entire UI/UX design, creating a user-friendly website to attract and retain more customers.
- Perform maintenance services while working hands on with clients and providing excellent customer service.

Linen Tech, Wuesthoff Rockledge Hospital

September 2015 – 2016

- Handled supply for the entire hospital, ensuring that providers had necessary materials to treat patients.
- Logged and tracked all inventory purchases, as well as maintained departmental budgets to decrease spending and free up capital.
- Interacted directly with patients to provide necessary care and maintain their well-being.
